Submission Deadlines

**Milestone #1: Team Setup dues at 7:25am on Wednesday Feb. 15 (2% of the final grade)**

- form your team naturally based on the common interests
- 7 persons per team grouping by CANVAS system ("Project_Team" function under the "People" item)
- self-identify the team leader

(c) Jonathan C.L. Liu, Ph.D.
Submission Deadlines

Milestone #2: Analysis and Design dues at 7:25am on Monday Mar. 20 (14% of the final grade)

Milestone #3: Implementation and Testing dues at 7:25am on Monday Apr. 17 (14% of the final grade)

(c) Jonathan C.L. Liu, Ph.D.
Grading Policy for Analysis and Design

- **Definition (20%)**: What is the system definition? Why is the system important?

- **Analysis (30%)**: What should be the inputs? What should be the outputs? What are the flow/logic required for the proposed system?
Grading Policy for Analysis and Design

- Design (30%) :
  - How many modules are required?
  - What are the classes and methods for each module/component?
  - What are the shared classes/methods across all modules?
Grading Policy for Analysis and Design

- **Execution Plan (20%)**:
  - What is the best way to divide the coding tasks?
  - What will the makefile look like?
  - Your own planned deadlines to carry out the implementation/testing on each module
Example Topic: JPEG(-2000)

- Can be a C++-based software system
- Input: given a JPEG compressed image file
  * Run-Length Decoding
  * Huffman Decoding
  * Reversed Zig-Zag Scan
  * Inverse DCT Transformation
- Output: display the decompressed image/pixels
