

John Hopcroft is a professor of Computer Science at Cornell University. He started his career on the Faculty at Princeton in 1964 and moved to Cornell in 1967. In 1987 he became the chair of the Department of Computer Science. In 1993 he became Associate Dean for College Affairs, and in 1994 he became Dean of the College of Engineering in which job he served until 2001 when he returned to the Department of Computer Science.

He earned his B.S. in Electrical Engineering from Seattle University in 1961 and Ph.D. in Electrical Engineering from Stanford University in 1964. He holds an honorary doctorate from Seattle University. His research interests are in the area of information capture and access.

Hopcroft has served on numerous advisory boards including the Air Force Science Advisory Board, NASA's Space Sciences Board and National Research Council's Board on Computer Science and Telecommunications. In 1986 he was awarded the Turing Award by the Association for Computing Machinery and in 1992, President Bush appointed him to the National Science Board, which oversees the National Science Foundation. He is a member of the National Academy of Engineering and the American Academy of Arts and Sciences. He is a Fellow of the Association for Computing Machinery, the Institute of Electrical and Electronics Engineering, and the American Association for the Advancement of Science.

His current professional activities include Council Delegate for the American Association for the Advancement of Science, Chairman of International Advisory Committee on Informatics and Engineering National College of Ireland, Member of Scientific Advisory Committee for the David and Lucile Packard Foundation. He is Editor of the *International Journal of Computational Geometry and Applications*, Associate Editor of *Information Sciences*, and Editor, *Journal of Computer and System Sciences*.
