**Blockchain Technology and Applications**  
**CIS 6930** Class Number 11604  **Section:** 05DD  
**Class Periods:** T period 8-9 (3:00 – 4:55), R period 9 (4:05 – 4:55)  
**Location:** Online, synchronous  
**Academic Term:** Fall 2020  
**Final Exam:** n/a

Nota bene: to complete email addresses append @ufl.edu

**Instructor:** Richard Newman  
email: nemo – use CIS6930 in subject line  
Phone Number: 352-283-1083 (text messages OK – include your name and CIS6930)  
Office Hours: TR period 10 (5:00 – 5:50)

**Teaching Assistants:** n/a

**Course Description**  
Credits: 3; Special topics course – will cover history of distributed consensus, underlying cryptographic and distributed systems concepts and technology; blockchain technologies, strengths and weaknesses; and blockchain applications.

**Course Pre-Requisites:** Assumes knowledge of data structures, networks, and programming chops

**Course Objectives**  
Students will study the design and implementation of blockchains, where they came from, and how they can be used. The successful student will be able to describe the elements of a blockchain, explain the underlying technologies, evaluate various applications using blockchains, and build an application based on blockchain technology.

**Materials and Supply Fees:** N/A

**Required Textbooks and Software**
- Title: MASTERING BITCOIN  
  - Author: ANTONOPOULOS  
  - Publication date and edition: 2017, 2/e (paperback or ebook)  
  - ISBN: 9781491954386

- Title: MASTERING ETHEREUM: BUILDING SMART CONTRACTS AND DAPPS  
  - Author: ANTONOPOULOS & WOOD  
  - Publication date and edition: 2018, 1/e (paperback or ebook)  
  - ISBN: 9781491971949

- Software: open software for blockchain

**Recommended Materials**
- Title: Blockchain: Blueprint for a New Economy  
  - Author: Swan  
  - Publication date and edition: 2015, 1/e (paperback or ebook)  
  - ISBN: 9781491920497
Software Use
All faculty, staff, and students of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate. We, the members of the University of Florida community, pledge to uphold ourselves and our peers to the highest standards of honesty and integrity.

Course Schedule (may be tweaked)
Week 1: Introduction - Blockchain basics, Blockchain generations
Week 2: Transactions, Contracts, Bitcoin implementation
Week 3: Keys, addresses, wallets, Underlying Cryptographic Mechanisms, Ethereum access
Week 4: Transactions, Scripting
Week 5: P2P Networks, Bitcoin network
Week 6: Bitcoin Blockchain, Mining / Project Proposals
Week 7: Distributed Consensus
Week 8: Ethereum transactions
Week 9: Smart Contracts, EVM
Week 10: Dapps, Tokens, Oracles
Week 11: Security
Week 12: Limitations, Friendly AI
Week 13: Final Presentations
Week 14: Final Presentations
Week 15: Final Presentations
Week 16: Final Presentations
Detailed assignments are posted on Canvas.

Attendance Policy, Class Expectations, and Make-Up Policy
Attendance will not be taken but attendance and participation are expected. Most weeks early in the term there will be an on-line quiz. The lowest quiz will be dropped. Questions are encouraged – post your question in the chat box. Try to formulate the question before asking it, and wait to see if it is answered in a few minutes so we can maintain flow. Lengthy discussions will be deferred to office hours. You are required to post and present an article from recent research with summary and analysis, and to read and respond online to at least two posts. Exercises are all to be done on an individual basis, but you are encouraged to discuss both textbook material and projects with others in the class. However, you may NOT share code. Term projects may be done as a group of up to four students. Excused absences are consistent with university policies in the undergraduate catalog (https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx) and require appropriate documentation.

Late submissions: Quizzes will be closed shortly after their due date and time – the lowest quiz score will be dropped. Projects and exercises will have one point penalty per day or partial day late until they close (usually a week after the due date).

University Honesty Policy
UF students are bound by The Honor Pledge which states, “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received
unauthorized aid in doing this assignment.” The Honor Code (https://www.dso.ufl.edu/scrc/process/student-conduct-honor-code/) specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

**Students Requiring Accommodations**

Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, https://www.dso.ufl.edu/drc) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.

**Course Evaluation**

Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at https://evaluations.ufl.edu/evals. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at https://evaluations.ufl.edu/results/.

**Student Privacy**

There are federal laws protecting your privacy with regards to grades earned in courses and on individual assignments. For more information, please see: http://registrar.ufl.edu/catalog0910/policies/regulationferpa.html

**Assignments**

There will be a quiz most early weeks, a few exercises in programming blockchains, a current research paper presentation and responses, and a term project with preliminary and final presentations. The term project may be done as a group of up to four students. Students are expected to submit a research paper based on their project work. Participation will include an initial homework, and class discussions.

**Evaluation of Grades**

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Total Points</th>
<th>Percentage of Final Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Participation*</td>
<td>20 pts</td>
<td>5%</td>
</tr>
<tr>
<td>Current research presentation</td>
<td>10 pts</td>
<td>5%</td>
</tr>
<tr>
<td>Quizzes</td>
<td>10 pts each</td>
<td>20%</td>
</tr>
<tr>
<td>Exercises</td>
<td>5 pts each</td>
<td>20%</td>
