The Way Home!

CAP6930 Virtual Environment Final Project Dec. 2005

Project Overview

Christmas is here, the holy season, the homing season. When everybody is looking forward to going back home, we’re honored to present this game; we are bringing you the homing feeling right here right now.

Let’s try our best to build up a road back home together, and make this home dream come true. Everyone is welcome to play on our newly designed game table and the most important thing – HAVE FUN for this holiday season!

Highlights

Easy Object Tracking: Low budget but well performed user tracking is the biggest highlight of this project.

Multimedia Environment: The game provides the players an interesting multimedia virtual environment.

Cooperation: The potential of cooperation multiple players brings more fun for the game.
