CIS/CEN 4914 – Senior Design CISE Department   –   Fall 2017

Advisor's Evaluation of Student Project & Performance

It is respectfully requested that the advisor return a score for the final report and project combined. The composite score contains the following components, explained below:

```
Completeness of Project ..... 10 points
Complexity of Project   ..... 10 points
Quality of Results      ..... 10 points
Quality of Final Report ..... 20 points
-----------------------------------------------
Total Score                    50 points
```

Completeness refers to the percent completion. For example, a project that is 60 percent complete would be scored 6/10 in the completeness category.

Complexity - Projects should be significantly complex. A *significant* project is one that is novel, well-developed, and useful to the project advisor. For example, a project that involves merely rewriting code or making a single Web page with few innovative features is not considered complex. In contrast, a major database system with Web interface as well as analysis and telecommunications modules would be considered complex.

Quality of Results - Do the project results hold together and perform well? Is the code buggy? For example, do Web pages crash or hang?

Quality of Report - It is recommended that student reports should be graded according to the advisor's understanding of a clear technical communication.

The Advisor is requested to complete the following form, to be attached by student to student's Final Report prior to submission to course supervisor.

This page does not need to be submitted to the course supervisor by the student, but the next page must be attached to the Final Report prior to submission to the course supervisor at the Final Presentation.

CIS/CEN 4914 Senior Design - Advisor Scoring Form/Questionnaire
Please Attach This Form to Student's Final Report or Fax to 352-273-0738

Semester (circle one): **FALL** SPRING SUMMER   **Year:** __2017__

Student Name _____   **UF-ID[5:8]** __ __ __ __

Part 1. Student's Project. Please score student's effort numerically. Do not use "A", "B", "C", etc. ***Note that the <u>Quality of Final Report is on a scale of 20 points, not 10 points</u>.***

Completeness of Project   ___ / 10 points

Complexity of Project   ___ / 10 points

Quality of Results   ___ / 10 points

Quality of Final Report   ___ / **20 points**   ← **NOTE: THIS IS <u>20</u> POINTS MAX**

Part 2. Student's Performance. Please circle a number (1 = poor, 2 = fair, 3 = adequate, 4 = good, 5 = excellent) in response to the following questions about your student and your interaction with him/her either individually, or in a design group. ***Note*****: Circling *N* means that question is not applicable, or that you don't know the answer:**

1. Applied knowledge of math, science, or engineering:	**1 2 3 4 5 N**
2. Designed/conducted experiments or organized/processed data:	**1 2 3 4 5 N**
3. Designed systems, components or processes to meet needs:	**1 2 3 4 5 N**
4. Functioned on multidisciplinary team or interacted well with you:	**1 2 3 4 5 N**
5. Was responsible, diligent, and ethical on this project	**1 2 3 4 5 N**
6. Used techniques, skills, and tools of modern engineering:	**1 2 3 4 5 N**
7. Appeared to understand hardware-software interaction :	**1 2 3 4 5 N**

Advisor Name _____ **Date** _____

Advisor Signature _____

Thank you for advising a Senior Design project!
